Ordering a 1:1 Notebook at Gleneagles Secondary College

From the start of 2017 all students attending Gleneagles Secondary College are expected to bring a school approved device to every class.

EduNet – our partner and supplier for devices for the 1-1 program

Gleneagles Secondary College has partnered with EduNet (www.edunet.com.au) since 2015 to support the rollout of the 1-1 computer program. EduNet is an Australian owned business based in Victoria. They have supplied computers and IT equipment to over 600 schools in over 15 years of operation and helped many government schools like Gleneagles to establish a 1-1 computer program.

Please note the college receives no financial benefits from this arrangement. It is simply to assist families to purchase at the best possible price and receive high quality service and support.

EduNet will be the port of call for all technical problems around insurance and warranty. This partnership provides a quick turn-around time for repairs.

Device Options

Research shows that pen based input continues to be of high value in an educational setting. The devices we offer are flexible touch screen tablet computers with a sturdy design for the demands of the classroom.

There are three options offered for 2017. All three offer the yoga flexibility and touch screen.

- Option 1 & 2 both have an 11 inch screen while option 3 has a 12 inch screen
- The processor is progressively faster from option 1 through to option 3 which comes with an Intel i5 processor
- Option 1 has a manual stylus.
- Options 2 & 3 both have an active digitizer which provides higher quality pen-based input, and also enables palm rejection, so users can rest their hand on the screen when writing. Option 3 has the active digitizer slot in the machine to store it in.

Alternative Devices

Gleneagles Secondary College is not in a position to support computer configurations in the form of students bringing their own device from home. For this reason all students will require one of the three devices listed, purchased through the school supplier.

Our technicians will pre-load a range of software from the Department of Education and Training’s Edustar Image including Win Office, school owned software and access to school licensed software such as Adobe suite (Photoshop etc).
The online ordering portal is accessible via gleneaglessc.technologyportal.com.au or alternatively follow the link from www.gleneagles.vic.edu.au
The password you will need to access the portal is GSC2017.

Select a device and then proceed to options. Selections highlighted in green are mandatory. Select other options as needed.

Complete Family details, read terms and conditions, then proceed to School IT Policy.
Read the schools Acceptable Use Policy with your child, agree and proceed to Payment.

Review your order information and payment options.
After you have completed payment a tax invoice and order confirmation will be emailed to you.
